Preview Changes

git clean -n

-> lists files that would be deleted w/out deleting anything

Remove untracked files

git clean -f

-> deletes untracked files in directory required by default

Remove untracked directories

git clean -fd

-> also removes untracked directory

Interactively removes files

git clean -i

-> opens menu where you select what gets deleted

Remove ignored files

git clean -fX

- use capital X
- removes files only in .gitignore
